

Sino-Russian Symposium on Materials Science and Processing Technology

INVESTIGATION OF A METHOD FOR INCREASING THE EFFICIENCY OF AN ELECTRIC POWER GENERATOR

Zakiev Denis
Graduate student
PGTU

Sino-Russian Symposium on Materials Science and Processing Technology

Double rotor permanent magnet generator with autoadaptation system

Simplicity

Reliability

Stability

Sino-Russian Symposium on Materials Science and Processing Technology

Simplicity

Working principle - is based on changing the relative angle of the magnetic systems of two rotors

Sino-Russian Symposium on Materials Science and Processing Technology

Reliability

Lack of additional
stabilization devices.

Sino-Russian Symposium on Materials Science and Processing Technology

Stability Configurable output range

Sino-Russian Symposium on Materials Science and Processing Technology

Thank you!
